٥٥.	Characterization of any known and unknown materials by XRD	8,000/-
	system	
૦૨.	Phase identification of any materials by XRD system	8,000/-
ంల.	Structural properties like lattice parameter cell volume, grain size etc,	৬,০০০/-
	determination by XRD	
08.	Quantitative phase analysis and percent of each compound present in	৬,০০০/-
	the sample by XRD system	
o¢.	Nano particles size determination XRD by system	৬,০০০/-
૦৬.	Morphology study by SEM system	৩,০০০/-
٥٩.	Average grain size determination by SEM system	৩,০০০/-
ob.	Quantitative elemental analysis by EDAX system	৩,০০০/-
০৯.	Both Morphology and electrical analysis by SEM system	¢,000/-
\$ 0.	Magnetic properties study by VSM system	১ ,৫০০/-
33 .	Magnetization measurement at low (-170°C) and high temperatures	১,৫০০/-
	(up to 700°C) by VSM system	
ડ ેર.	Hysteresis loop measurement by VSM system	১,৫০০/-
১৩.	Magnetization measurement by VSM system	১,৫০০/-
